

We take security very, very seriously.

Bank-level security

WePay operates entirely over SSL, using 256-bit encryption. Our practices are closely monitored by TRUSTe, DigiCert, McAfee, and the Better Business Bureau.

Your info is safe

All sensitive personal information is encrypted and stored in a Payment Card Industry Data Security Standard (PCI DSS) Compliant environment. Your information is always protected.

Your money is safe

Your funds are always held by our FDIC-insured partner bank, so your money is never at risk. We also closely monitor account access for suspicious activity to detect account compromises before they occur.
